PROFILE

I have 1 years of experience developing systems, interfaces, bots, and technological solutions to make the web a better place. I am dedicated to writing and refactoring clean, reusable, and scalable code in Angular, javascript ,typescript applying good practices and development standards.

My skills also include implementing system improvements, optimizing sites, standardizing patterns, and suggesting and executing ideas that add value to the project I'm working on.

WORK EXPERIENCE

Front-end developer

Roots Solutions

Jun 2021 - May 2022 (1 year)

- Dynamic Forms : The system is able to create forms and allows the user to control validation, input types, design without write code.
- Google Maps Api: This application allow users to know nearby places(markets ,...) by live location. The distance between any two locations had been selected, and best route between them ,etc .
- Implementing continuous improvements, working on frontend.
- Functional programming in templates and plugins to add the necessary monitoring features.

Instructor

iSchoolTech

Sep 2023 – present

- instructor at iSchoolTech, teaching programming to students of various grades remotely.
- Skilled in delivering engaging lessons and encouraging hands-on learning, ensuring students grasp fundamental programming concepts with enthusiasm.

Front-end developer

freelance work

(in progress)

- we designed and developed a comprehensive online platform for the Faculty of Commerce, streamlining the application process for master's and professional diploma programs.
- This platform enables students to submit applications online and provides real-time application status tracking until final approval.
- It also facilitates efficient file uploads and processing by staff, ultimately leading to student acceptance
- Additionally, the system allows accepted students to view available subjects within their chosen diploma and select their preferred courses
