Professional Summary:

Software Engineer building enterprise web applications using React, TypeScript, and SAP BTP. Architects frontend systems, delivers end-to-end features, and ships production-ready workflows spanning authentication, document management, and portal experiences. Bridges SAP CAP services with reusable UI patterns to keep complex applications reliable and maintainable.

Experience:

Software Engineer — All for One Group Mar 2026 – present

- Architected and provided an enterprise customer service portal on SAP BTP, defining the frontend architecture, technical documentation, and scalable design patterns using React, TypeScript, TanStack Query, and Tailwind CSS.
- Engineered a full-featured document management module integrated with an enterprise DMS REST API, supporting end-to-end user workflows, including search, preview, download, and secure file sharing
- Built and maintained a shared authentication package used across multiple frontend applications, ensuring consistent and secure identity management at the platform level.
- Worked across the full stack by interfacing with SAP CAP backend services, bridging frontend and backend integration within the SAP BTP ecosystem.

React.js Developer — CODXI Apr 2025 – Mar 2026

- Built and maintained the frontend of a custom ERP system using React.js, TypeScript, Tailwind CSS, and Ant Design.
- Architected and delivered core ERP modules including secure authentication, role-based access control, lead/CRM management, hierarchical organizational charts, and real-time analytics dashboards.
- Engineered reusable component libraries and optimized rendering performance, improving UI efficiency and load times.
- Connected frontend modules with backend APIs, ensuring data accuracy and system reliability.

Coding Instructor (Part-Time) — iSchoolTech Sep 2023 – Oct 2025

- Presented over 800 sessions across multiple grades, maintaining a 100% quality score remotely.
- Evaluated student projects and provided constructive feedback to improve problem-solving and coding skills.
- Taught HTML, CSS, JavaScript, Flutter, Python, Figma and Unity, empowering students with practical programming skills.

Frontend Developer (Contract) — Central Unit for Software Production, KSU Sep 2023 – Feb 2024

- Designed and developed a web platform for online applications for master's and professional diploma programs using Angular**,** Angular Material, and RxJS.
- Architected the system with 3 distinct user roles (Admin, Employee, Student), each with role-based access and workflows.
- Collaborated closely with designers, backend engineers, and stakeholders to deliver features on time.
- Built real-time application status tracking and course selection for accepted students.

Frontend Developer — Roots Solutions Jun 2021 – May 2022

- Built a dynamic no-code form builder system allowing users to configure validation rules, input types, and layouts.
- Integrated Google Maps API to optimize location-aware recommendations, resulting in faster and more efficient travel routes.
- Designed and implemented responsive UI components, ensuring a seamless experience across desktop and mobile devices.

Education:

Kafr El-Sheikh University, Egypt 2019-2023

- Bachelor's degree in Computer Science & Information Systems (Department of Software Engineering).

Technical Skills:

- React.js, Next.js, Angular
- JavaScript (ES6+), TypeScript
- Html, CSS, SCSS, Bootstrap, Tailwind, MUI, Ant Design, shadcn, Angular Material
- Redux, RxJS, React Query
- Vitest, React Testing Library
- Data structures and algorithms
- Git/GitHub
- Problem Solving, OOP

Soft Skills:

- Communication and Team Collaboration
- Time Management and Organization
- Adaptability and Continuous Learning
- Leadership and Mentoring
- Attention to Detail
- Creativity in Solution Design.

Languages:

- **Arabic**: Native.
- **English**: Intermediate
